Response to Amendment

1. Applicant's request for consideration of May 2, 2006 is acknowledged and entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clark (US Patent 5,375,768).

Clark '768 discloses a sprinkler comprising a riser 16 for receiving a pressurized fluid, a nozzle 22, means for mounting the nozzle as recited, a turbine 56 mounted for rotation inside the riser, drive means for connecting the turbine to the nozzle as recited, and a valve that prevents by selectively re-directing the pressurized fluid around the turbine over-spinning of the turbine (column 3, lines 36-54). The valve is capable of preventing the over-spinning regardless of the type of pressurized fluid since it acts on fluid pressures.

Response to Arguments

4. Applicant's arguments and declaration filed May 2, 2006 have been fully considered but they are not persuasive. The USC 103 rejection for obviousness mailed February 13, 2006 does not modify the sprinkler of '768 in any way. It states that this sprinkler has a valve 62 that prevents over-spinning of the turbine by selectively re-directing pressurized fluid around the turbine as stated in column 3, lines 36-54. As water pressure increases the valve 62 opens further to restrict flow into the turbine and

allowing a greater amount of water to flow around and by-pass the turbine. The examiner concedes that '768 discloses the fluid as water only, however, the office action states that since this valve 62 operates on pressures, it is fully capable of carrying out the same function regardless of whether the fluid is water, air, or a combination of both and thus formed the basis for the USC 103 obviousness rejection.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
